

Faisal A. Al-Otaibi

Senior Business Analyst · Banking & Retail Transformation

faisal.sample@example.com | +966 5X XXX XXXX | Riyadh, Saudi Arabia | [linkedin.com/in/sample-profile](#)

Business analyst with six years across banking and retail transformation programmes in Saudi Arabia. Comfortable owning the analysis workstream end to end: discovery workshops, written specifications, acceptance criteria, and the follow-through that keeps delivery honest.

Professional Experience

Senior Business Analyst - Najd Digital Solutions

Mar 2022 - Present

- Led requirements gathering across 6 business units for a core banking migration, delivering signed-off specifications ahead of each release gate.
- Introduced a structured intake process that cut rework on change requests and shortened the analysis cycle for new features.
- Facilitated workshops between operations and engineering, translating regulatory obligations into testable acceptance criteria.
- Mentored two junior analysts through their first end-to-end delivery, both now owning their own workstreams.

Business Analyst - Sahab Retail Group

Jun 2019 - Feb 2022

- Mapped the order-to-cash process end to end and documented the hand-offs that had never been written down before.
- Built the reporting layer used by category managers for weekly performance reviews.
- Coordinated user acceptance testing across three regional warehouses, tracking defects to closure before go-live.
- Standardised requirement templates later adopted by the wider PMO.
